BUSINESS · TECHNOLOGY · PEOPLE · PROCESS

Vigilant is a global technology services firm specializing in Oracle Applications, Database Technology and Fusion Middleware.

We work with companies of all sizes – from multi-national, Fortune 1000 organizations through small and medium businesses to develop strategies and systems that ultimately deliver business value through the implementation of enterprise technology.

BUSINESS: We focus on identifying and solving our customer's business problems – not just implementing technology.

TECHNOLOGY: While our core focus is Oracle - including Fusion Middleware (SOA Suite, OBIEE, J2EE Application Server, BPM, EAI, EII, ESB, Portal and Governance), Database Servers and Applications, Vigilant Consultants are experienced in a wide range of technologies, applications and IT infrastructure.

PEOPLE: Many members of Vigilant's global team worked directly for Oracle and acquired companies, including BEA. This has given us unique opportunities to develop highly specialized skills and expertise that is not commonly available.

PROCESS: Vigilant follows a methodical process from Sales through Delivery to ensure that we engage consultatively, use defined project models and deliver outstanding customer support.

CUSTOMER TESTIMONIALS

“Vigilant Technologies has been helping us to manage and maintain our core Oracle Databases while providing higher levels of service at reduced costs.”

Technical Services Manager, Property Management Company

“Vigilant helped us with the upgrade of our Oracle E-Business Suite and the database to the latest version. They have done the job in entirety and helped us to focus our internal resources on other important projects.”

Chief Information Officer, WB Doner

“Our Entire RAC implementation has been outsourced to Vigilant. They implemented a 2 Node RAC on Linux and have been managing it to meet our SLA’s with our customers.”

Director, Software Development Company

“The DBA Support from Vigilant is outstanding. I have worked with some other outsourced DBAs in the past, and they blow everyone else away.”

Director of IT, Manufacturing Firm
